Claims, New:

Please add the following new claims:

ay

- 1 39. A display device, comprising:
- 2 a cover having a front panel and a back panel,
- 3 said front panel having an opening therethrough,
- 4 a support means attached to said back panel for supporting said display device,
- 5 and at least one page formed of a sleeve configured to hold a flat sheet-like
- 6 member, said at least one page attached to said cover,

7 said front panel of said cover being positionable such that a user sees a visible
8 portion of said at least one page when said front panel of said cover is situated
9 in front of said at least one page.

1 40. The display device of claim 39 wherein said front panel has a first position and a
2 second position, wherein in said first position, said front panel hides a hidden
3 portion of said at least one page and leaves visible a visible portion of said at least
4 one page, and wherein in said second position said hidden portion of said at least
5 one page is exposed.

1 41. The display device of claim 39 wherein said sleeve configured to hold a
2 photograph.

1 42. The display device of claim 39 wherein said cover further comprises an internal
2 panel having a top, and wherein said at least one page is attached to said top of said
3 internal panel.

1 43. The display device of claim 42 wherein said internal panel is connected to said
2 back panel by a bottom panel and said back panel is connected to said front panel by a
3 top panel.

1 44. The display device of claim 39 further comprising a plurality of pages formed of
2 a sleeve configured to hold a flat sheet-like member, said plurality of pages attached
3 to said cover.

Very respectfully submitted,

Carol D. Titus
